RSIC-Garage Door Motor Kit Isolator Instructions

Installation Instructions:

- Close Garage Door.
- Measure distance from ceiling to top of garage door opener motor. Enter measurement here:
- (_____).
- Disconnect power from garage door opener motor.
- Support Garage Door Motor with ladder or stand.
- Disconnect metal brackets from the existing garage door motor.
- Disconnect metal brackets from ceiling.
- Install GARAGE DOOR MOTOR SILENCERS using the 1-½" flat washers and the 3" hex head screws (screws need to be installed into the joist).
- Trim 4" from the bottom of the metal support brackets to compensate for the 4" additional space that the GDS added.
- Bolt the metal brackets from step 2 to the GDS motor isolators using the 3/4" bold, 3/4" flat washers, and the 7/16" nyloc nut.
- Measure and adjust height of garage door rails using noted measurement taken in step 2.
- Reinstall the garage door motor to the metal brackets using the original hardware.
- Plug in your garage door opener motor.
- Test and adjust if needed.
- Repeat steps on other side.
