We Identify and S.T.O.P. Your Noise Problems

Material Name: Specialty Fiber Glass Insulation

Section 1 - Chemical Product and Company Identification

- Product Name: Fiber Glass Insulation
- CAS#: Fiber Glass Wool
- Not Available: Continuous Filament Glass fiber (CAS# 65997-17-3)
- Not Available: Urea extended phenol-formaldehyde resin (cured)
- Not Available: Urea Formaldehyde Binder, Cured
- Not Available: Acrylic binder
- 50-00-0: Formaldehyde

Section 2 - Composition / Information on Ingredients

- 65997-17-3: Fiber Glass Wool
- Not Available: Continuous Filament Glass fiber (CAS# 65997-17-3)
- 25104-55-6: Urea extended phenol-formaldehyde resin (cured)
- 9011-05-6: Urea Formaldehyde Binder, Cured
- Not Available: Acrylic binder
- 50-00-0: Formaldehyde

Additional Component Information
- *Components of mat-faced products, i.e. all of the above except Whispertone® Wall Board Plain (Unfaced). Free formaldehyde released only with high temperature and humidity.
- Black products may contain carbon black as a colorant encapsulated in the binder. Due to product form, exposure to respirable dust is not expected.

Section 3 - Hazards Identification

Emergency Overview

APPEARANCE AND ODOR: Amber, white or black fiber glass mat or board. May have off white facer. No significant odor.

Inhalation of gases released during heat treatment or curing of this product may cause temporary upper respiratory irritation and/or congestion-remove affected individuals to fresh air.

Inhalation of excessive amounts of dust from the product may cause temporary upper respiratory irritation and/or congestion-remove affected individuals to fresh air.

Potential Health Effects

Summary

Breathing dust from this product may cause a scratchy throat, congestion, and slight coughing. Getting dust or fibers on the skin or in the eyes may cause itching, rash, or redness. Additional health and safety information is provided in Section 11 of this material safety data sheet.

When subjected to high heat and humidity, this product may release formaldehyde gas. Formaldehyde is irritating to the eyes and respiratory system and is known to cause nasopharyngeal cancer (based on animal and human studies). Formaldehyde may cause skin or respiratory sensitization (allergy).
Material Name: Specialty Fiber Glass Insulation

**Inhalation**
Irritation of the upper respiratory tract (scratchy throat), coughing, and congestion may occur in extreme exposures.

**Skin**
Temporary irritation (itching) or redness may occur.

**Absorption**
Formaldehyde is a skin sensitizer and may lead to an allergic reaction in some individuals.

**Ingestion**
This product is not intended to be ingested (eaten). If ingested, it may cause temporary irritation to the gastrointestinal (digestive) tract.

**Eyes**
Temporary irritation (itching) or redness may occur.

**Ears**
Temporary irritation (itching) or redness may occur.

**Primary Routes of Entry (Exposure)**
Inhalation (breathing dust, fibers, or vapors), skin, and eye contact.

**Target Organs**
Nose (nasal passages), throat, lungs, skin, eyes.

**Medical Conditions Aggravated by Exposure**
Pre-existing chronic respiratory, skin, or eye diseases or conditions.

---

### Section 4 - First Aid Measures

**First Aid: Inhalation**
Remove to fresh air. Drink water to clear throat, and blow nose to remove dust.

**First Aid: Skin**
Wash gently with soap and warm water to remove dust. Wash hands before eating or using the restroom.

**First Aid: Ingestion**
Product is not intended to be ingested or eaten. If this product is ingested, irritation of the gastrointestinal (GI) tract may occur, and should be treated symptomatically. Rinse mouth with water to remove fibers, and drink plenty of water to help reduce the irritation. No chronic effects are expected following ingestion.

**First Aid: Eyes**
Do not rub or scratch your eyes. Dust particles may cause the eye to be scratched. Flush eyes with large amounts of water for 5-15 minutes. If irritation persists, contact a medical professional.

**First Aid: Ears**
Do not rub or scratch the ear if itching occurs. Wash gently with soap and warm water to remove dust or fibers.

**First Aid: Notes to Physician**
This product is a mechanical irritant, and is not expected to produce any chronic health effects from acute exposures. Treatment should be directed toward removing the source of irritation with symptomatic treatment as necessary.

---

### Section 5 - Fire Fighting Measures

**Flash Point:** Not applicable

**Upper Flammable Limit (UFL):** Not applicable

**Lower Flammable Limit (LFL):** Not applicable

**Auto Ignition:** Not determined

**Flammability Classification:** Not determined

**Rate of Burning:** Not determined

**General Fire Hazards**
There is no potential for spontaneous fire or explosion.

**Extinguishing Media**
Carbon dioxide (CO2), water, water fog, dry chemical.

**Fire Fighting equipment/Instructions**
No special procedures are expected to be necessary for this product. Normal fire fighting procedures should be followed to avoid inhalation of smoke and gases.

---

**General Fire Hazards**
Pick up large pieces. Vacuum dusts. If sweeping is necessary, use a dust suppressant such as water. Do not dry seep dust accumulation or use compressed air for clean-up. These procedures will help to minimize potential exposure.

**Extinguishing Media**
Carbon dioxide (CO2), water, water fog, dry chemical.
Handling Procedures
Use protective equipment as described in Section 8 of this material safety data sheet when handling uncontained material.

Storage Procedures
Warehouse storage should be in accordance with package directions, if any. Material should be kept dry, and protected from moisture.

Section 8 - Exposure Controls / Personal Protection

Exposure Guidelines
A: General Product Information
Glass wool fiber, OSHA voluntary Health and Safety Partnership Program (HSPP): 1 f/cc TWA for fibers linger than 5 µm with a diameter less than 3µm.

B: Component Exposure Limits
Fiber Glass Wool (65997-17-3)
ACGIH: 1 f/cc TWA (respirable fibers: length > 5µm, aspect ratio equal to or greater than 3:1; 5mg/m3 TWA (inhalable fraction)

Continuous Filament Glass fiber (CAS # 65997-17-3)
ACGIH: 1f/cc TWA (respirable fibers: length, >= 5µm, aspect ratio equal to or greater than 3:1); 5 mg/m3 TWA (inhalable fraction)

Formaldehyde (60-00-0)
ACGIH: 0.3 ppm Ceiling
OSHA 0.75 ppm TWA; 2ppm STEL; 0.5 ppm Action Level (irritant and potential cancer hazard - see 29 CFR 1910.1048.

PERSONAL PROTECTION EQUIPMENT

Personal Protective Equipment: Eyes/Face
Safety glasses with sideshields are recommended to keep dust out the eyes.

Personal Protective Equipment: Ears
Use ear protection (earplugs, hood, or earmuffs) to prevent.

Personal Protective Equipment: Respiratory
A respirator should be used if ventilation is unavailable, or is inadequate for keeping dust and fiber levels below the applicable exposure limits. In those cases, use a NIOSH-certified disposable or reusable particulate respirator with an efficiency rating of N95 or higher (under 42 CFR 84) when working with this product. For exposures up to five times the established exposure limits use a quarter-mask respirator(e.g., MSA's DDM-11, Racal's Delta N95 or higher. Operations such as sawing, blowing, tear out, and spaying may generate airborne fiber concentrations requiring a higher level of respiratory protection. For exposures up to 50 times the established exposure limits use a full-face respirator, rated N99 or higher.

Where formaldehyde exposure is possible, use a NIOSH-approved full-faced formaldehyde respirator with a dust/mist prefilter.

Ventilation
In fixed manufacturing settings, local exhaust ventilation should be provided at areas of cutting to remove airborne dust and fibers. General dilution ventilation should be provided as necessary to keep airborne dust and fibers below the applicable exposure limits and guidelines. The need for ventilation systems should be evaluated by a professional industrial hygienist, while the design of specific, ventilation systems should be conducted by a professional engineer.

Personal Protection Equipment: General
Wear a cap, a loose-fitting, long-sleeved shirt and long pants to protect skin from irritation. Exposed skin areas should be washed with soap and warm water after handling or working with fiber glass. Clothing should be washed separately from other clothes, and the washer should be rinsed thoroughly (run empty for a complete wash cycle). This will reduce the chances of fiber glass being transferred to other clothing.
Material Name: Specialty Fiber Glass Insulation

Section 10 - Chemical Stability & Reactivity Information

Chemical Stability
This is a stable material. This product is not reactive.

Hazardous Decomposition
Although fiberglass itself is not combustible, the following decomposition product may be released during the throat, and/or itching of the eyes and skin.

Hazardous Polymerization
Will not occur.

Section 11 - Toxicological Information

Acute Toxicity
A: General Product Information
Dust from this product is a mechanical irritant, which means that it may cause temporary irritation or scratchiness of the throat, and/or itching of the eyes and skin.

B: Component Analysis - LD50/LC50
Urea extended phenol-formaldehyde resin (cured) (25104-55-6)
Oral LD50 Rat: 7 g/kg; Oral LD50 Mouse: 7 g/kg
Urea Formaldehyde Binder, Cured (9011-05-6)
Inhalation LC50 Rat: 7 g/kg; >167 mg/m³; Oral LD50 Rat: 8394 mg/kg; Oral LD50 Mouse: 6361 mg/kg
Formaldehyde (50-00-0)
Inhalation LC50 Mouse: 454 mg/m³/4H; Oral LD50 Rat: 100 mg/kg; Oral LD50 Mouse: 42 mg/kg; Dermal LD50
Rabbit: 270 µL/kg

Carcinogenicity
A: General Product Information
The Occupational Safety and Health Administration (OSHA), national Toxicology Program (NTP), international Agency for Research on Cancer (IARC), and American Conference of Governmental Industrial Hygienists (ACGIH) have not classified this product as a carcinogen.

B: Component Carcinogenicity
Fiber Glass Wool (65997-17-3)
ACGIH: A3 - Confirmed animal carcinogen with unknown relevance to humans (related to Glass wool fibers)
NTP: Reasonably anticipated to be a carcinogen (respirable size) (related to Glasswool) (Possible select carcinogen)
IARC: Group 3 - Not Classifiable (IARC Monograph 43, 1988; Monograph 81, 2002, related to insulation glass wool)
Continuous Filament Glass Fiber (CAS# 65997-17-3)
ACGIH: A4 - Not classifiable as a Human Carcinogen
IARC: Group 3 - Not classifiable (IARC Monograph 43, 1988; Monograph 81, 2002)
We Identify and S.T.O.P. Your Noise Problems

Material Name: Specialty Fiber Glass Insulation

Formaldehyde (50-00-0)

ACGIH: A2 - Suspected human carcinogen
OSHA: 0.75 ppm TWA; 2 ppm STEL; 0.5 ppm action level (irritant and potential cancer hazard - see 29 CFR 1910.1048)
NTP: Reasonably anticipated to be a carcinogen (possible select carcinogen)
IARC: Group 1 - known human carcinogen

Continuous Filament Glass Fiber (CAS # 65997-17-3)

ACGIH: A4 - Not classifiable as a Human Carcinogen
IARC: Group 3 - Not classifiable (IARC Monograph 43, 1988; Monograph 81, 2002)

Chronic Toxicity

Fiber Glass Wool: In October 2001, IARC classified fiber glass wool as Group 3, "not classifiable as to its carcinogenicity to humans." The 2001 decision was based on current human and animal research that shows no association between inhalation exposure to dust from fiber glass wool and the development of respiratory disease. This is a reversal of the IARC finding in 1987 of a Group 2B designation (possibly carcinogenic to humans) based on earlier studies in which animals were injected with large quantities of fiber glass. NTP and ACGIH have not yet reviewed the IARC reclassification or most current fiberglass health research; at this time, both agencies continue to classify glass wool based on the earlier animal injection studies.

Continuous Filament Glass Fiber: No chronic health effects are known to be associated with exposure to continuous filament glass fiber. Long-term epidemiologic studies do not show any increases in respiratory cancer or other disease among employees who manufacture this product. In 1987, the International Agency for Research on Cancer (IARC) classified continuous filament fiber glass as a Group 3 substance, "not classifiable as to its carcinogenicity to humans." In 2001, IARC re-affirmed this designation. Because of the large diameter of continuous filament fibers, these fibers are not considered respirable.

Exposure to formaldehyde gas (released under conditions of high heat or humidity) may cause eye and upper respiratory irritation, and possible respiratory or skin sensitization (allergy). If sensitization occurs, subsequent exposures to formaldehyde may worsen asthma or other respiratory problems, and cause allergic-type reactions.

Exposure to formaldehyde gas has been associated with the development of nasopharyngeal cancer in laboratory animals and humans. Formaldehyde has been classified as a known human carcinogen, Group 1, by the International Agency for Research on Cancer (IARC). The US Occupational Safety and Health Administration (OSHA) and the US National Toxicology Program (NTP) consider formaldehyde to have carcinogenic potential. OSHA specifically regulates formaldehyde under 29 CFR 1910.1048.

A detailed listing of references on fiberglass health effects can be found in the publication HSE-64C, “Health and Safety Aspects of Fiber Glass,” which can be downloaded from Johns Manville’s Internet homepage, www.jm.com (select “Health Safety and Environment”).

Section 12 - Ecological Information

Ecotoxicity
A: General Product Information
No data available for this product.

B: Component Analysis - Ecotoxicity - Aquatic Toxicity
Formaldehyde (50-00-0)
- 96 Hr LC 50 fathead minnow: 24.1 mg/L (flow-through); 96 Ht LC 50 bluegill: 0.10 mg/L (flow-through)
- 5 min EC 50 Photobacterium phosphoreum; 5.0 mg/L; 15 min EC 50 Photobacterium phosphoreum; 7.26 mg/L; 25 min EC 50 Photobacterium phosphoreum; 6.81 mg/L
- 96 Hr EC 50 water flea; 20 mg/L

Section 13 - Disposal Considerations

US EPA Waste number & Descriptions
A: General Product Information
This product, as supplied, is not regulated as a hazardous waste by the U.S. Environmental Protection Agency (EPA) under Resource Conservation and Recovery Act (RCRA) regulations. Comply with state and local regulations for disposal. If you are unsure of the regulations, contact your local Public Health Department, or the local office of the EPA.

B: Component Waste Numbers
No EPA Waste Numbers are applicable for this product's components.

Disposal Instructions
Dispose of waste material according to Local, State, Federal, and Provincial Environmental Regulations.
### Section 14 - Transportation Information

Shipping Name: This product is not classified as a hazardous material for transport.

### Section 15 - Regulatory Information

#### A: General Product Information

SARA 311/312: This product is not classified as hazardous under SARA 311/312. Immediate (acute) health hazard. Delayed (chronic) health hazard.

B: Component Analysis

This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4).

- **Formaldehyde (50-00-0)**
  - SARA 302: 500 lb. TPQ
  - CERCLA: 100 lb. final RQ; 45.5 kg final RQ

#### State Regulations

A: General Product Information

No additional information available.

B: Component Analysis – State
