## Cardiac Rehab Exercise Room

To whom it may concern:

I just wanted to give you an update on the much improved noise levels in our Cardiac Rehab exercise room. Since we have had the Acoustical Surfaces Fabric Wrapped Fiberglass sound panels installed our staff and patient population have commented on the drastic reduction of noise that is generated off the treadmills and other exercise equipment located in this room. (link to product: [http://www.acousticalsurfaces.com/fabric\\_panel/fpswallp.htm?d=4](http://www.acousticalsurfaces.com/fabric_panel/fpswallp.htm?d=4) )

As you well know between the noise from the telemetry system, phones, exercise equipment we were unable to easily understand normal conversation between staff and patients prior to the sound panels. Thanks to your expertise, the selection and rapid installation of these panels, we are able to provide both a safer and more pleasant environment to our cardiovascular patient populations. Our thanks to you and to *Acoustical Surfaces!!!*
