PAC INTERNATIONAL, INC.

RSIC-DC04X2™

Low Profile Wall Systems

The Sound of Silence

RSIC-DC04X2 Resilient Sound Isolation DeCouple Clip

The RSIC-DC04X2™ low profile wall system has been developed to provide a low profile, high performance, noise control system. The RSIC-DC04™ or the RSIC-DC04X2™ are used to support the studs in a wall or joists in a ceiling system. These systems are adjustable to allow for a low profile (1/2" to 2") separation. The RSIC-DC04™ and RSIC-DC04X2™ clips are designed to support additional studs (in walls), or joists (in ceilings) separate from the structural framing members.

Note: The RSIC-DC04™ and RSIC-DC04X2™ are not designed to carry structural loads. The RSIC-DC04™ and RSIC-DC04x2™ are intended to support the loads of gypsum board and uniform loads only. Focused loads and point loads must be engineered by a licensed professional.
